

Suggested Catalog Additions and Corrections (continued from July/August 1997)

John Lyding

To briefly review, the material in this series was first brought to my attention by Joe Laura (#1238). Follow-up information was obtained from Richard Learn (#3265) who now has the covers in his possession. Full size photocopies have been sent to the US Catalog Editor.

The October 26, 1936, cover's corner card of Figure 1 (see page 156) shows that the company's name is misspelled in the catalog for pattern G192. The new catalog should list the company as G.W. Carnrick Company. The Caenrick company was located at 20 Mount Pleasant Avenue, Newark, New Jersey and they were manufacturing chemists.

The Hercules Powder Company of San Francisco, California is listed as the main user of perfin pattern H159.5 (HP/CO) in the catalog. A San Diego, CA location is also listed in the supplemental data appendix. Figure 2 (page 156) cover's corner card's lists: Hercules Powder Company (Incorporated), 120 Broadway, New York, New York. This suggests a correction and addition for the catalog. It is recommended that the next revision also add "Inc." to the company's name and the New York city location should be added to the supplemental data appendix.

The catalog originally listed perfin pattern J109.5 (J·M/C(o)) as belonging to Whittemore-Sim Corporation of New York, NY. Additions and Corrections 1/82 relegated that entry to the

supplemental data appendix and stated that the positive identification was Johns-Manville, Albany, New York. Additional data was provided that the pattern was known precanceled New York, NY. This June 13, 1933 cover (Figure 3), postmarked at the Grand Central Annex, New York, NY, provides a corner card of John-Manville, 22 East 40th Street,

New York, NY. This location deserves at least a supplemental data appendix entry.

Our catalog lists the Kingan Provisioning Company of Indianapolis, Indiana is listed as the main user of perfin pattern K4 (K). The supplementary data appendix lists: Kingan & Co, Richmond, VA;

Kingan & Co, Jacksonville, FL; and Kingan Provision Co, Baltimore, MD. This envelope provides a new corporate name, Kingan & Company, at the Indianapolis, Indiana location. The cover was postmarked at Indianapolis, Indiana on June 20, 1930.

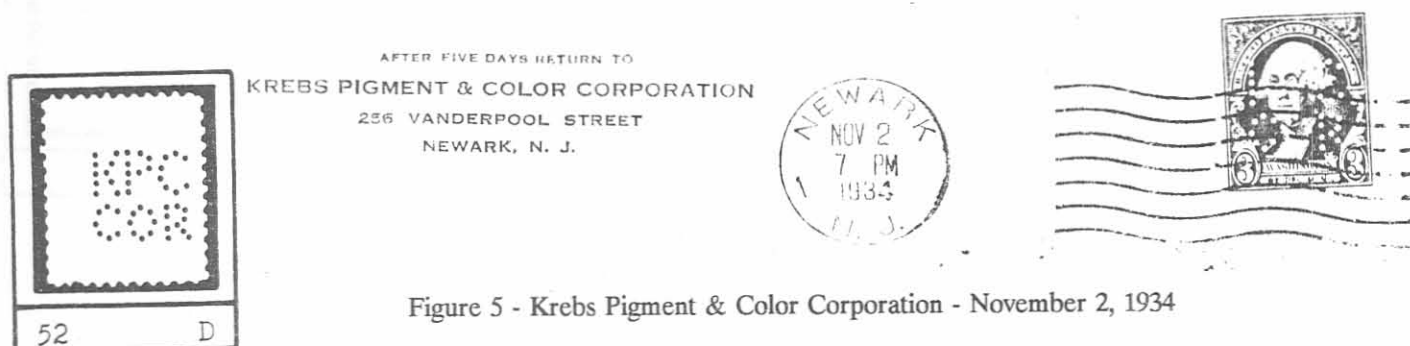

Figure 5 - Krebs Pigment & Color Corporation - November 2, 1934

Perfin pattern K52 (KPC/COR) is listed by the catalog as being used by the Krebs Pigment & Color Company of Cleveland, Ohio. The November 2, 1934, cover shown in Figure 5 suggests that it was a "Corporation" rather than a "Company." On the other hand, Krebs may have used both names at different times. In any event the illustrated cover demonstrates the need for a supplemental data appendix entry listing the corporation's the Vanderpool Street, Newark, NJ location.

Figure 6 - L. Sonneborn Sons, Inc - February 4, 1932

Figure 6 shows a February 4, 1932 cover from L. Sonneborn Sons, Inc., 88 Lexington Avenue, New York, NY. There currently is an extra "n" in the catalog listing of "Sonnenborn."

Figure 7 - Lehigh Valley Coal Sales Office - October 30, 1933

The catalog entry for perfin pattern L158 (LVC/SCO) lists a New York City location. This October 30, 1933 posting's corner card (see Figure 7) lists: Lehigh Valley Coal Sales Company at 224 Harrison Street, Syracuse, New York calls for a supplemental data appendix entry.

The National Tube Company's perfin pattern N163 (NT/CO) is listed in the catalog with the single location of Pittsburgh, Pennsylvania. Figure 7 shows a July 3, 1933 cover that provides a supplemental location of the

ELLWOOD CITY, PA.

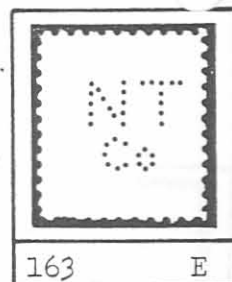

Figure 7 - National Tube Company - July 3, 1933

company's Ellwood Works in Ellwood City, Pennsylvania. At the same time that city is added to the supplemental data appendix the US Catalog Editor should consider adding the Statler Office Building, 20 Providence Street, Boston, Massachusetts location that was reported by former US Catalog Editor, Harry Rickard *TPB*, November/December 1987, p. 184.
